

Table 1: Joint Wald Tests of Pre-trends for Quarterly Quality Measures (2017 Q1–2024 Q2 Outcomes)

	2 Year Full Pre-Window	2 Year Window with Donut	1 Year Window with Donut
QM 401	12.10 (7) [0.0972]	8.81 (6) [0.1843]	0.52 (2) [0.7728]
QM 404	5.98 (7) [0.5422]	5.61 (6) [0.4682]	0.89 (2) [0.6412]
QM 406	8.09 (7) [0.3251]	7.79 (6) [0.2536]	2.52 (2) [0.2834]
QM 407	13.10 (7) [0.0697]	7.97 (6) [0.2401]	0.84 (2) [0.6557]
QM 410	7.49 (7) [0.3793]	6.63 (6) [0.3562]	1.60 (2) [0.4483]
QM 419	4.13 (7) [0.7649]	4.18 (6) [0.6528]	0.18 (2) [0.9161]
QM 434	3.29 (7) [0.8570]	3.09 (6) [0.7969]	0.41 (2) [0.8134]
QM 452	36.24 (7) [0.0000]	28.57 (6) [0.0001]	1.23 (2) [0.5403]

Notes: Each cell reports the Wald χ^2 statistic for the joint null that all pre-treatment event-time coefficients equal zero, followed by degrees of freedom in parentheses and the p-value in brackets.

The 2 Year Full Pre-Window tests $\tau = -8$ to $\tau = -1$ with reference $\tau = -1$.

The 2 Year Window with Donut tests $\tau = -8$ to $\tau = -2$ with reference $\tau = -2$, dropping $\tau = -1$.

The 1 Year Window with Donut tests $\tau = -4$ to $\tau = -2$ with reference $\tau = -2$, dropping $\tau = -1$.

Sample sizes by outcome for the three columns are: QM 401 [188,762; 187,445; 187,445], QM 404 [196,502; 195,159; 195,159], QM 406 [198,690; 197,339; 197,339], QM 407 [200,578; 199,208; 199,208], QM 410 [201,403; 200,030; 200,030], QM 419 [197,246; 195,897; 195,897], QM 434 [150,667; 149,652; 149,652], QM 452 [197,817; 196,464; 196,464].

All specifications include facility and quarter fixed effects and covariates: government + non_profit + chain + beds + occupancy_rate + pct_medicare + pct_medicaid + cm_q_state_2 + cm_q_state_3 + cm_q_state_4.

Outcomes in this table are available over 2017 Q1–2024 Q2.

Table 2: Joint Wald Tests of Pre-trends for Quarterly Quality Measures (2017 Q1–2023 Q3 Outcomes)

	2 Year Full Pre-Window	2 Year Window with Donut	1 Year Window with Donut
QM 405	7.10 (7) [0.4183]	7.51 (6) [0.2762]	0.67 (2) [0.7153]
QM 451	1.61 (7) [0.9783]	1.41 (6) [0.9650]	0.35 (2) [0.8414]
QM 471	6.11 (7) [0.5268]	2.03 (6) [0.9170]	0.37 (2) [0.8301]

Notes: Each cell reports the Wald χ^2 statistic for the joint null that all pre-treatment event-time coefficients equal zero, followed by degrees of freedom in parentheses and the p-value in brackets.

The 2 Year Full Pre-Window tests $\tau = -8$ to $\tau = -1$ with reference $\tau = -1$.

The 2 Year Window with Donut tests $\tau = -8$ to $\tau = -2$ with reference $\tau = -2$, dropping $\tau = -1$.

The 1 Year Window with Donut tests $\tau = -4$ to $\tau = -2$ with reference $\tau = -2$, dropping $\tau = -1$.

Sample sizes by outcome for the three columns are: QM 405 [121,085; 120,209; 120,209], QM 451 [163,199; 162,013; 162,013], QM 471 [111,344; 110,597; 110,597].

All specifications include facility and quarter fixed effects and covariates: government + non_profit + chain + beds + occupancy_rate + pct_medicare + pct_medicaid + cm_q_state_2 + cm_q_state_3 + cm_q_state_4.

Outcomes in this table are available over 2017 Q1–2023 Q3.

Table 3: Joint Wald Tests of Pre-trends for Quarterly Quality Measure 453

	2 Year Full Pre-Window	2 Year Window with Donut	1 Year Window with Donut
QM 453	12.76 (7) [0.0781]	10.61 (6) [0.1013]	0.93 (2) [0.6292]

Notes: Each cell reports the Wald χ^2 statistic for the joint null that all pre-treatment event-time coefficients equal zero, followed by degrees of freedom in parentheses and the p-value in brackets.

The 2 Year Full Pre-Window tests $\tau = -8$ to $\tau = -1$ with reference $\tau = -1$.

The 2 Year Window with Donut tests $\tau = -8$ to $\tau = -2$ with reference $\tau = -2$, dropping $\tau = -1$.

The 1 Year Window with Donut tests $\tau = -4$ to $\tau = -2$ with reference $\tau = -2$, dropping $\tau = -1$.

Sample sizes for the three columns are QM 453 [140,715; 139,695; 139,695].

All specifications include facility and quarter fixed effects and covariates: government + non_profit + chain + beds + occupancy_rate + pct_medicare + pct_medicaid + cm_q_state_2 + cm_q_state_3 + cm_q_state_4.

QM 453 is available over 2018 Q1–2023 Q3.
