

Table 1: Effects of Ownership Change on Occupancy, Payer Mix, and Case Mix

Outcome	No controls	Controls	Observations
Occupancy rate	2.649*** (0.336)	2.784*** (0.343)	626,307
Medicare share	1.358*** (0.205)	1.223*** (0.216)	626,307
Medicaid share	-0.900 (0.557)	-1.715*** (0.575)	626,307
Case mix total	0.044*** (0.006)	0.041*** (0.006)	438,331

Notes: Each cell reports the coefficient on *post*, with standard errors in parentheses. All models include facility and calendar-month fixed effects. The controls column adds beds, government ownership, nonprofit ownership, and chain affiliation.

Case-mix is restricted to observations from Q2 of 2018 through Q2 of 2023.

Standard errors are clustered two ways by facility and calendar month. Statistical significance: *** $p < 0.01$, ** $p < 0.05$, * $p < 0.10$.
